**Attachments:** [Mine 7 Proposed Revision Areas 7-28 Shaft and 7N Power Drop Site.dwg](#)

---

Good afternoon –

I would like to initiate permitting preparation to add the two areas outlined in the attached dwg. We would like to begin work on both of these sites as soon as possible, but not later than October 2026. Context details of what I show in the drawing are as follows:

1. Eastern Area:

a. Future Return (Fan) Shaft 7-28

- i. 2.39 acres of pad development in magenta
- ii. I show a near 5,700-linear feet road 30' wide to access this site from the nearest permitted access road. The topo indicates a previously used or currently existing road along this route, but aerial imagery is unclear. I have not performed recon work out there myself yet. It seems tying to this location from the nearest permitted access road would be easier than a new route from the nearest public road.
- iii. At this time, we do not have a refined powerline route to add to the permit, but one is being developed that we may add in a follow up revision.
- iv. If possible, schedule a bat survey for any areas that may require one if there is a chance it would allow us to work before October.
- v. Please review. If something seems off I am happy to discuss.

2. Western Area:

a. Future Utility Borehole

- i. Will support the underground 7-North Longwall system with either or a combination of power, water, and/or communication.
- ii. Best access seems to use existing gas roads coming from Lock 17 Road south of Shoal Creek.
- iii. New access road will need to be constructed to access the proposed pad site.
- iv. We plan to come off of the existing power utilities and drop our own meter, so I have a general 50' powerline ROW corridor shown in there for the permit as well.
- v. If possible, schedule a bat survey for any areas that may require one if there is a chance it would allow us to work before October.
- vi. Please review. If something seems off I am happy to discuss.

Let me know your thoughts when you get a chance to review guys.

Thanks.
