

STATE OF ALABAMA
SURFACE MINING COMMISSION
P.O. BOX 2390 - JASPER, ALABAMA 35502-2390
(205) 221-4130 • FAX: (205) 221-5077

REVISED: January 6, 2026

Permit Renewal Number: P-3964-63-27-U
RENEWAL TO PERMIT
FOR UNDERGROUND COAL MINING OPERATIONS

Pursuant to the Alabama Surface Mining Control and Reclamation Act, Act No. 81-435, and duly promulgated rules of the Commission, Renewal is hereby approved for permit:

P-3964-63-27-U

Issued to:
Warrior Met Coal BC, LLC
16243 Highway 216
Brookwood, AL 35444
(Blue Creek Mine No. 1)

License No.: L-848

The permit is renewed for an additional term of 5 years.
All terms and conditions of the permit remain in effect.

Renewal Findings 1: By comments dated May 23, 2022 the U.S. Fish & Wildlife Service concurred the project is not likely to adversely affect the Indiana Bat and the Northern Long-Eared Bat if tree removal only occurs from October 15 through March 31.

Renewal Condition 1: The permittee may only conduct tree removal from October 15 through March 31.

Renewal Condition 2: If tree removal from the potential summer roosting habitat is necessary outside October 15 through March 31 timeframe an Indiana Bat and Northern Long-Eared Bat presence/absence survey must be conducted and the U.S. Fish & Wildlife Service approval must be submitted to ASMC prior to tree removal.

Renewal Condition 3: A Subsidence Control Plan must be submitted to the ASMC for review and approval prior to commencement of underground mining.

Renewal Condition 4: No underground mining may occur within the 30-degree angle of draw of an occupied dwelling where subsidence is expected to result unless and until the permittee has submitted a permit revision that includes enforceable measures to address potential impacts from subsidence-related fugitive methane migration to occupied dwellings and ASMC has approved such revision. Such measures must be specific, feasible, and appropriate to site-specific conditions; be sufficient to protect life, health, and property; and provide for identification of and response to conditions that may result from subsidence-related fugitive methane migration.
