Status Report	Increments						
Increment Number:							
Acres Disturbed							
Acres Reclaimed							
Acres Revegetated							
INITIAL NOTIFICATION ONLY							
Length / Height of un-reclaimed highwall; attach map of current highwall location.							

Section A: - By signature below, Operator attests that the mining operation is in compliance with the requirements of 880-X-10C-.64 Cessation of Operations: Temporary.

Section B: Operator General Information (To be completed by mine operator):

1. Yes No - The mine site is free any offsite impacts to the environment, damages to property, or threats to human life.
2. Yes No - Access to the site is controlled and monitored to ensure that unauthorized persons are not allowed onto the site to minimize risks to public safety.
3. Yes No - There are sufficient economically mineable reserves remaining to support resuming operations during reasonable market conditions.
4. Yes No - Environmental monitoring and water treatments, as required, will or have continue(d) during the temporary cessation period.

Section C: Note

At any time during an operator's temporary cessation period, ASMC may require a meeting to discuss the temporary cessation status to include items such as, economic justification of temporary cessation, probable future coal markets; potential issues for resuming operations, potential dispositions, or other points of justification supporting temporary cessation.

Section D: Attach any additional information that supports / justifies initial temporary cessation or the continuation of temporary cessation.

As authorized agent for the above named permit:

**Alabama Surface Mining Commission
Temporary Cessation Status Report – Surface Mine**

Company Name:			
Mine Name:		Permit No	P-

Section D: (To be completed by the Alabama Surface Mining Commission)

Inspection and Enforcement:

Yes No - Are there any outstanding unabated violations on the above noted permit. If yes, all violations and penalties are to be cleared prior to temporary cessation issuance or renewal.

Yes No - Reclamation is current up to the final pit, excluding the spoil, which is necessary to back-fill the final highwall.

Yes No - Based upon inspection, the mine site is not causing or incurring any offsite impacts to the environment, damaging property, or posing any threats to human life.

Yes No - The Status Report Information reported above by the mine operator is complete and accurate.

Technical

Yes No - Are there any unpaid civil penalties on the above noted permit. If yes, all violations and penalties are to be cleared prior to temporary cessation issuance or renewal.

Yes No - Required Insurance is in effect.

Yes No - Bonding is at current bonding rates and is determined to be sufficient to justify future continuation of mining and reclamation operations. If no, update required bonding prior to temporary cessation issuance or renewal. Add note to comments below.

Yes No - The above named permit is valid and has not expired, or is in-house at ASMC for renewal.

Yes No - The above named mining license is valid or is in-house at ASMC for updates.

Comments/Notes, if needed: (attach additional sheet if necessary)

SMCRA Review Signature / Date

I & E Supervisor Review Signature/Date

The information provided in this Temporary Cessation Status initial notification or renewal, as well as additional inquiries, if any, has been reviewed in comparison with the requirements of Alabama Surface Mining Commission Regulation 880-X-10C-.64 & 880-X-10D-.62 Cessation of Operations: Temporary. Based upon this review, it has been determined that the current operation:

DOES QUALIFY DOES NOT QUALIFY

for initial or continued temporary cessation status. This signed status report will be retained on file and serve as documentation for qualification determination. A letter will be submitted to the mine operator as notification of the determination.
